

AromaGEN

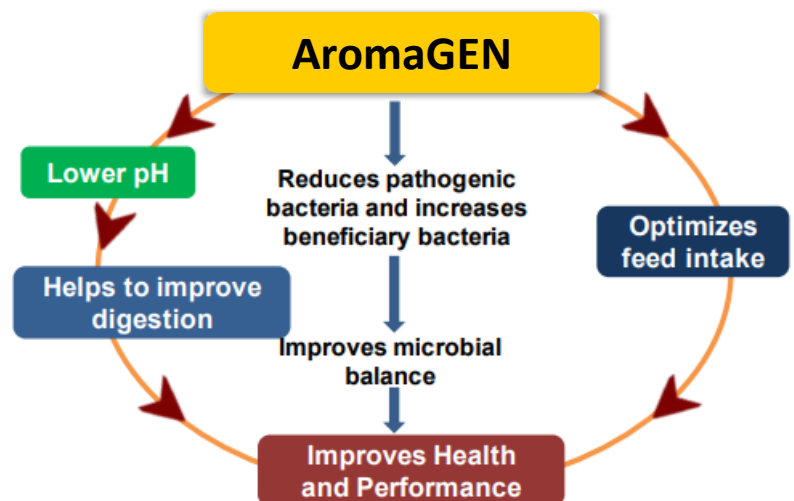

Feed acidifiers with essential oil

AromaGEN

Feed acidifiers with essential oil

AromaGEN is the synergistic combination of coated buffered organic acids and their salts, prebiotics and essential oils. Aromagen effectively reduces microbial load in feed and improves nutrients utilization.

Role of AromaGEN

Mechanism of action

- Reduced gastric pH.
- Reduced survival of pathogens through the stomach.
- Increased digestion of nutrients.
- Direct killing of bacteria.

Feature and Benefits

- Unique combinations.
- Combination of coated buffered organic acids.
- Essential oil potentiates the action of organic acids.
- Prebiotics improves beneficial bacterial growth.
- To stimulate feed consumption.
- Promotes commensals in the gut.
- Improves egg shell quality.
- Improves digestion and absorption of nutrients.
- Helps to maintain an optimum pH in gut.
- To inhibit the growth of pathogenic bacteria.
- Improves weight gain and livability.
- Optimizes FCR.

Recommendation

1 kg / ton of feed.

Presentation

20 kg bag.
