## Vitamins, Minerals & Amino Acids Supplement

Vitamins, Minerals and amino acids are very vital for poultry. They play a role in:

### Physiological health status

Vitamins are generally required for the maintenance of general health and physiological functions like growth, production and reproduction

### Prevention of diseases

### Production performance

Rio-V Plex is a mix of Vitamin B complex with limiting amino acids for poultry such as Lysine and Methionine, along with minerals to enhance the growth rate and maintain the health status in poultry.

Maintain appetite, digestion and metabolism

Promotes growth and feathering

Improves egg production and liver functions

Stimulates immune system

Improves hatchability and livability
