## Tiamulin Hydrogen Fumarate

Tiamulin Hydrogen Fumarate is an antibiotic feed supplement which is effective against both gram positive and gram negative organisms.

It is used for the treatment and prevention of Chronic Respiratory Disease (CRD) and air sacculitis caused by *Mycoplasma gallisepticum*.

CRD is one of the most common respiratory diseases of poultry. Stress caused by moving the birds, debeaking, vaccination and other operations and handlings or due to unfavourable conditions such as excessive heat, cold and bad ventilation make the birds more susceptible to CRD.

NewMULIN 10% poultry feed granule has broad spectrum of activity against respiratory infections caused due to *Mycoplasma spp.*, *Pasteurella* and *Actinobacillus* along with activity against enteric infections.

### Composition

Each 1 kg of premix contains

Tiamulin Hydrogen Fumarate 10%

### Features

- Free flowing granules
- No incompatibility

### Benefits

- Broad spectrum of activity
- Controls mortality due to CRD
- Improves egg production in birds with Chronic Mycoplasma infection

### Recommendation

#### Layers, Broilers and Breeders

- 200 g / ton of feed if administered on a daily basis
- 500 g to 1 kg / ton of feed for 7 days if administered once in a month or as recommended by the Veterinarian

**Presentation : 1 kg bag**
