

Mineral Deposits

Bio Film

NEWGEN

Hallmark of innovation

ENKARE

Liquid Descaler for Pipeline

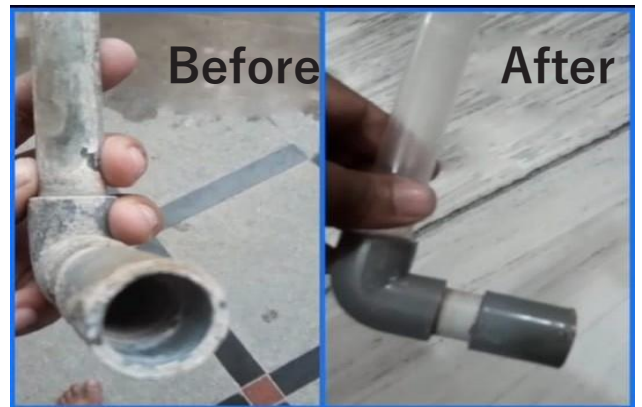

ENKARE

Liquid Descaler for Pipeline

Enkare is the synergistic blend of organic acids and buffers for dissolving mineral deposits in pipelines, drinkers and hatcheries.

Mechanism of action

Reacts with the calcium carbonate and magnesium carbonate compounds present in the scales and dissolves them. Deactivates large variety of micro-organisms in water.

ENKARE

Feature

Safe and non-staining
Non-corrosive

Benefits

Removes scales and mineral deposits from Water lines
Removal of Biofilms from water lines
Broad spectrum activity against bacteria and fungi

Recommendation :

- For descaling of water lines : 20ml / lt of Water (for 3-4 hours)
- Descaling of hatchery machines : 20-30 ml / lit of water.
- Cleaning of plastic equipment : 30-40 ml / lit water.
- Cleaning of broiler farm equipment 30-40 ml / lit of water

Presentation : 1L & 5L HDPE can
