Vimicell™ Premix

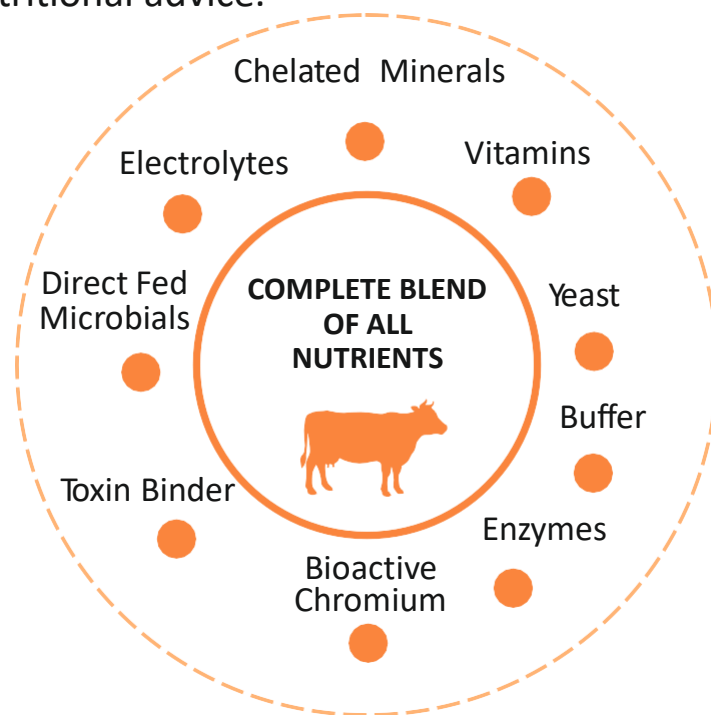

Complete premix for ruminats

Vimicell™ Premix

Complete Premix for Ruminants

Cows need minimum amounts of energy and proteins to function, grow and produce milk. Cows also require a minimum amount of fiber in each meal to function well and have a healthy digestive system. In addition to this, a good amount of vitamins and minerals are essential for growth and production, which can be given as a cattle premix.

We have a complete premix with the best supplements for your cattle. Vimicell™ Premix - Complete premix provides feed mill owners and dairy farmers a best nutritional advice.

FEATURES

- Highly Bio available nutrients
- High concentration of DFM and Vitamins
